

## PMP CERTIFICATION:

Project Management professional (PMP) is associate degree internationally recognized skilled designation offered by the Project Management Institute (PMI). The processes of those information square measures are delineate by their inputs, tools and techniques, and outputs. The PMBOK conjointly emphasizes the interaction and interdependency between completely different method teams. As an example, the outputs from one method could also be employed by one or additional alternative processes as inputs.

Government, industrial and alternative organizations use PMP certified project managers in a shot to boost the success rate of comes all told areas of data, by applying the same and evolving set of project management principles as contained in PMI's PMBOK Guide.

Candidates who take the computer-based test receive their results (passed or not passed) in real time upon completion. PMI conjointly evaluates proficiency levels in every project management method cluster in four levels. On top of Target, Target, Below Target, and wishes Improvement. Examiners give these results to the candidate on a score report once the examination. PMI conducts application audits to verify the expertise and/or education documented on certification applications.

The aim of the audit is to boost the quality of the certification program and of the certification holders.
